| <b>Appointment Location</b> | <b>Headquarters's Main Office and Field</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                     |
| <b>Field of Activity</b>    | <p>At Boomkwekerij Fleuren, great care is taken to produce the best quality fruit trees. This not only requires a lot of attention to the fruit trees, but also the entire production system, which ensures the best end result. Boomkwekerij Fleuren is not only big because of the supply of good quality trees, but is also known for its good service, delivery reliability and giving tailor-made advice. We would also like to let you know that Boomkwekerij Fleuren is the brains behind the 'cutting tree' and the '3K tree'. The cut tree is the tree form with which planting systems are set up worldwide. And the 3K tree is a tree form suitable for intensive cultivation, with fruits in the year of planting Boomkwekerij Fleuren, one of the largest fruit tree nurseries in the Netherlands. Boomkwekerij Fleuren is more than just a supplier of high-quality fruit trees for professional fruit growers. By devising new tree shapes and planting systems, we distinguish ourselves in the market and thus occupy a prominent place within the entire chain.</p> |                                                                                     |
